Technology Desking.

Established in 1992, Technology Desking specialise in the design, manufacture and installation of furniture products focused on managing technology in the workplace.

From our original UK offices, we have expanded internationally to include additional offices in both Asia and North America. Together with a number of committed alliance partners, we support our customers at a local level anywhere in the world.

Sit-Stand.

An **Active** Workforce.
A **Healthier** Workplace.

Studies have shown that alternating between sitting and standing positions throughout the working day helps to minimise a growing number of health problems associated with sedentary working patterns. Our sit-stand office desk provides you with the tools to a healthier and happier workplace.

Increased Brain Function

Staying in one position for long periods of time has been shown to restrict oxygen supply to the brain, resulting in a loss of productivity. Stand up to sluggishness and boost your efficiency.

Blood Circulation & Risk of Heart Disease

A lack of movement throughout the working day slows fat burn, which can raise blood pressure, in addition to blood sinking to the legs.

Reduced Back Problems

Spinal problems can be caused by uneven weight distribution attributed to sedentary behaviour. Alternating between sitting and standing helps to break these damaging patterns and even encourage a better posture.

Better Muscular Performance

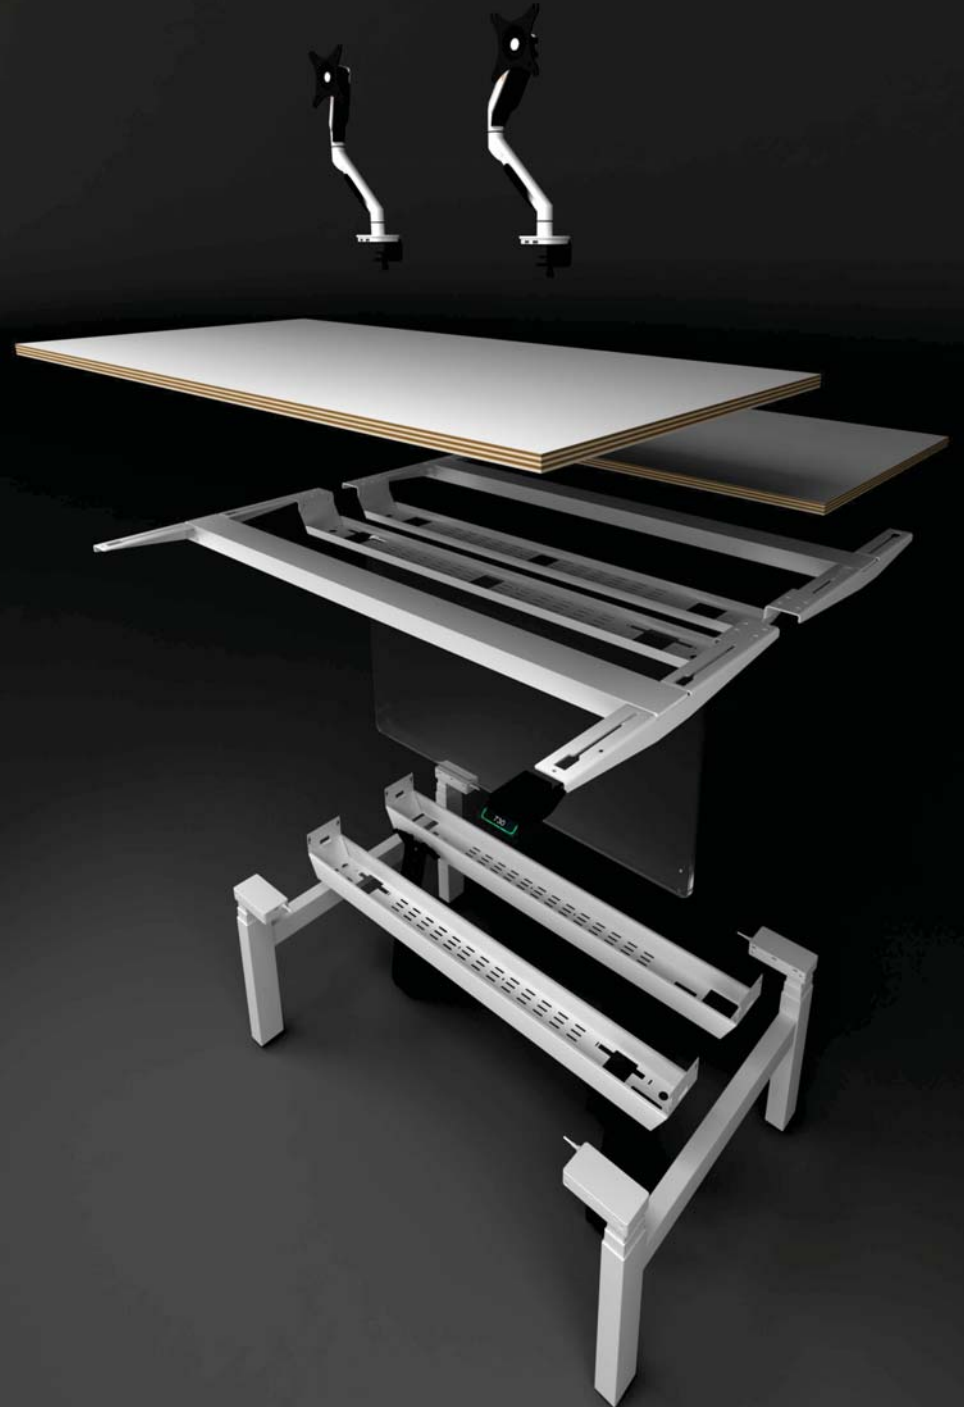

Inactive leg and back muscles can become weaker and reduce the ability to sit straight. Get moving to start improving.

You Imagine it.
We Create it.

With near-limitless configurations, dimensions, and finishes to choose from, we can provide everything you need to design your dream desk.

Do your colleagues utilise advanced setups that require full cable management? Or are they more likely to plug in their laptop for fast access? Whatever the requirement we have you covered.

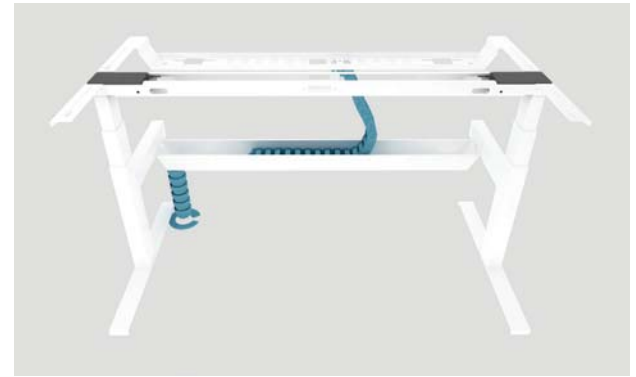

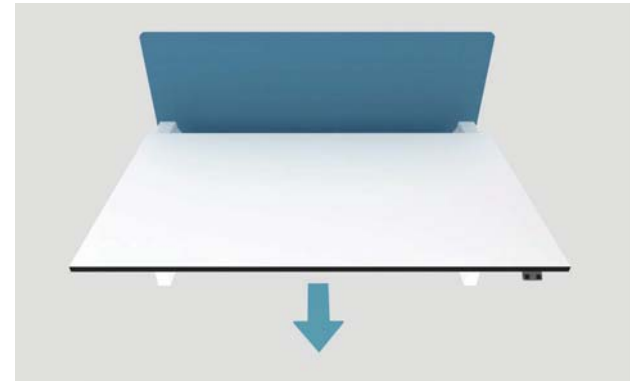

Modern Technology.
Premium Functionality.

We utilise the very best in height adjustment technology, both in quality and functionality. Our Sit-Stand desks boast an adjustment range of 650mm and lower movement noise when compared with market alternatives.

We offer a range of controller styles, from basic up/down controls to advanced LED paddles incorporating Bluetooth connectivity and programmable heights.

Cables Managed. Clean Aesthetic.

From desktop to floor, we have earned a reputation for exceptional cable management solutions, regardless of the in-desk requirements.

Further to an upper cable tray as standard and multiple optional components, all of our Sit-Stand desks incorporate a sliding worksurface free of charge, allowing swift and easy under-desk access.

Bench.

Affordable Elegance .

From design, to shape and colour, our fixed height desk range provides a simple solution that is fully adaptable to your workplace.

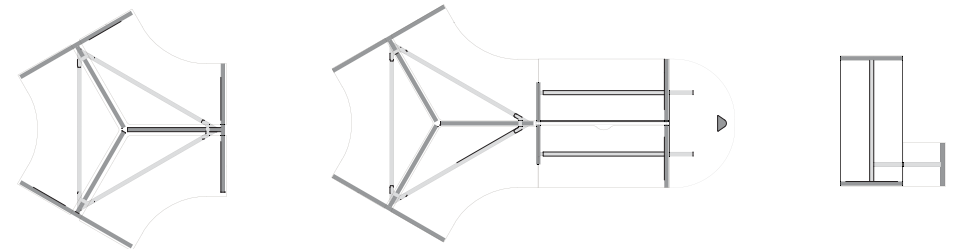

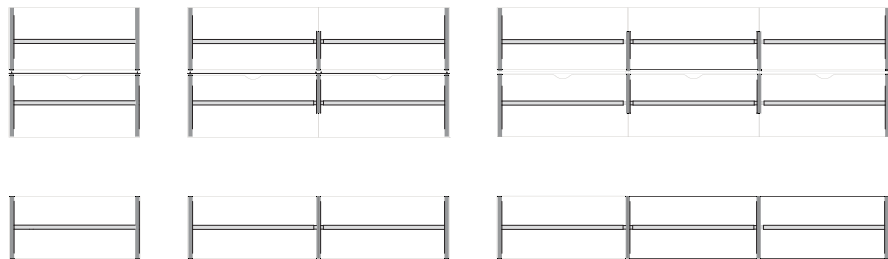

With numerous options for IT management, privacy features and finishes, what design will you choose for your office?

Fewer Components.
More Outcomes.

Simple by design, sturdy by nature. Our desks are adaptable to your space, whether you opt for a classic linear style or something more unique.

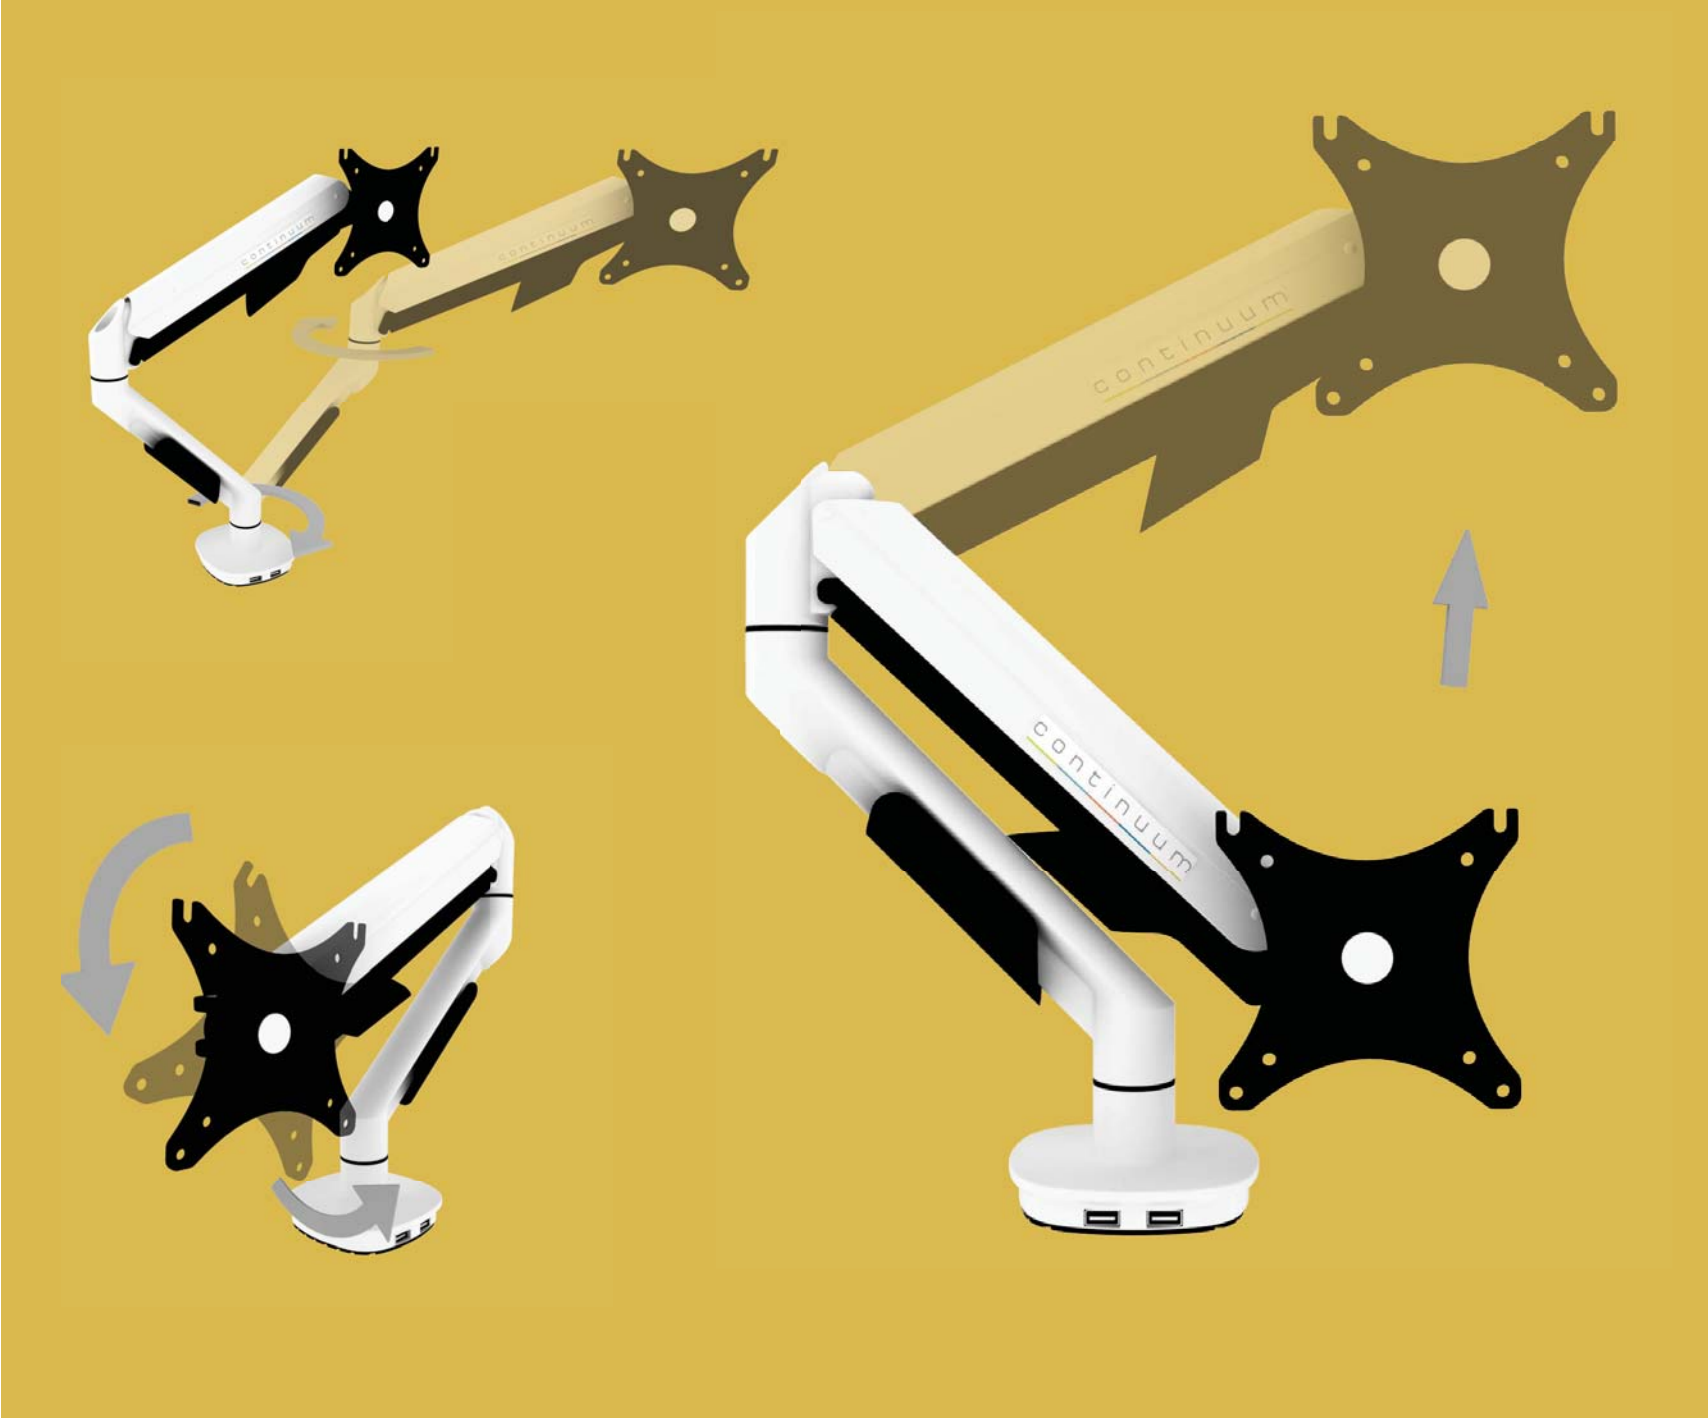

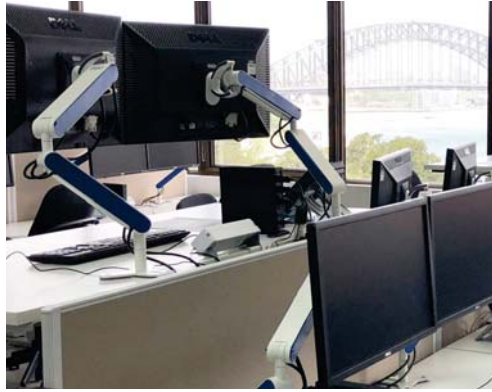

Monitor Arms - Continuum.

Unlimited Adjustment .

Our gas lift monitor arms provide instant adjustment for the user, ideal for desking scenarios where the ergonomic requirements differ from person to person.

Utilising a desktop mounted clamp and featuring integrated cable management, the Continuum arm also incorporates two USB ports for immediate user connectivity. A double arm option is also available for dual screen configurations.

Monitor Arms - Zgo.

Endless Possibilities.

The tension sprung Zgo family of monitor arms provide complete flexibility for the modern office. Featuring the ability to house up to 2 monitors, the system also provides options for mounting laptops and tablets.

A modular design with fully incorporated cable management coupled with a wide range of colour options and customisable magnetic panels ensure that Zgo can adapt to meet the varying needs of your office while always fitting in with your businesses identity.

Desk Accessories.

A Elevator PC Sling
 B Panda Power Module
 C Pen Tray
 D Arc Wireless Charger
 E Nova Task Light

The Finishing Touches.

Complete your desk with our range of accessories, from smart storage solutions to on-desk units and integrated wireless charging.

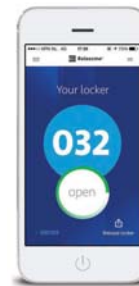

Smart Storage.

Flexible Working.
Reduced Storage.

'Simplicity' Keyless locking technology enables a locker to be assigned to an individual when they come into the office, and unassigned again when they leave, with a simple red and green LED light system informing users when a locker is already occupied.

This 'hot-lockering' approach to storage significantly reduces the need for areas dedicated to personal storage within the building.

With Releezme your storage system is connected to the Internet enabling users to easily find and access available lockers on their smartphone. This increases flexibility for both the user and facilities management.

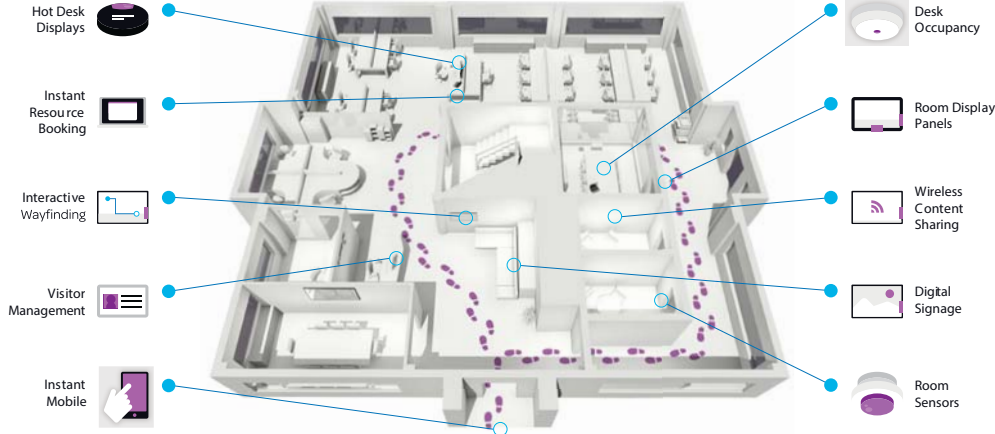

Integrated Technology.

Smart Office.
Smarter Working.

Intevi's digital solutions are designed to work natively with commercial displays offering enhanced corporate messaging, streamlined communications and simplified broadcasting.

With room booking management and wireless casting technology, Intevi's solutions can integrate throughout your workplace incorporating features such as occupancy sensors to provide real time analytics and space optimisation to reduce overall costs.

Task Chairs.

You Choose.
We Provide.

We work with a number of partners to offer a select range of 'finishing furniture' for your project

Complete your office with a task chair to provide your workforce with the highest level of comfort.

- A Freedom Task
- B Freedom Headrest
- C Liberty Task
- D Airpad with Headrest
- E Joyce IS3
- F Vintage IS5

Relax. Meet. Collaborate.

The Irys Pod system creates flexible multi-use spaces within your office without the need for planning and with the ability to move, change, and grow with your business.

Whether you're looking for a private office, breakout areas, a meeting room or an informal space Irys can be tailored to your needs with innovative technology integration and a wide range of finishes.
